The meme of all memes. Decent controls and good performance but otherwise the game is pretty lifeless. Ultimately though I had to stop playing it because of the frustration factor. Navigating through a complex level once is fine but making me traverse it multiple times with no checkpoints in between is just torture.. I was kind of less than enthused with the first GT pack they added but because of the promise of this pack I hoped that maybe Namco Bandai would redeem itself...unfortunately this pack is kind of worse than the first.

They added in a handful of costumes none of which are really that great or worth owning, the characters in this DLC are a bit better in my opinion than those in the first pack but the main story missions are over in the blink of an eye leaving you feeling less than resolved and the three added PQs do add some extra play time BUT overall this pack is over so fast you're almost left wondering what they really added at all.

It feels fragmented, as if they chopped a full GT pack into two halves to get more money out of their customers. It's nice to see love for GT but this isn't the way to do it. Unless you are a solid completionist and hardcore Dragon Ball fan I say skip it because nothing in this pack enhances the game enough to warrant a \$9.99 asking price.. Fairly toss, dont bother. beautiful tables, tx sector is an absolute must have. teed off is basically caddy shack. cue ball wizard is always fun, hundreds of hours of gameplay here in this package! no doubt!. a really fun puzzle adventure game with a cyberpunk feel to it. the puns sorta overuse themselves but after awhile you get used to them. i would higly reccomend this game

-Good and viable beginner character.

-Goku.

-only 5 bucks.

-get it now.. GET IT WHEN IT IS ON SALE, INTERESTING BUT A VERY SHORT GAME=

This is a very interesting game telling the story of the Iran's 1979 Revolution when Iran deposed one tyrant and welcomed another (but a much worse one). It is point and click game with quick time events, a nice game albeit very short. Get it when it is on sale.. Pretty repetitive, but strangely addictive. It's great for passing time when you don't have anything better to do. You finish the game fairly quickly as well.. I'm not great at writing reviews but here I go anyway.

First off, I highly recommend it. It's a bit on the shorter side compared to some other VNs, but the quality is very high, and it is very much worth the money and time.

The Last Birdling is a VN about two children, one human and one not. Their species hate each other, and kill each other on sight. A birdling child is playing in the forest one day when a human child approaches her, and the two become friends.

They struggle to keep their friendship intact and secret from the humans, against increasingly poor odds.

It took me about two and a half hours to get my first ending (though it took me 30 minutes to finish the demo, and I fast forwarded through the "demo chapters" once I played the main game, so assume about 3 hours for your first run if you read fast like I do).

. NO SAVE FEATURE. Tedious fetch quests. A rip off.

This is the first time I have seen a game specifically designed to trick people into playing past the two hour refund mark before they discover how badly they've been ripped off.

The price tag may only be \$2.00, but that is \$2.00 you will never get back for an unfinished game. This should be advertised as early access or should be free to play.

The first thing you will see is a dialogue telling you that because the game is so special, there is no save feature.

That is because if there was a save feature, you might actually be able to handle the long, tedious fetch quest over several sessions. There is nobody alive who hates themselves enough to do the fetch quest in one sitting.

I don't buy that the game is somehow better without a save feature. Don't fall for that trick like I did.
