Everything seems ok on the outside, but when you look at the game more closely - you'll see a lot of rawness.

Even tho this game is all about bouncing the ball in the direction you want it to go... it doesn't work like that here. There are no physics in this game. The doughling, the thing you control, has predetermined bouncing angles. And I think I counted only 6 different angles (you can't even bounce the ball straight upwards!). This is such a dealbreaker for an arkanoid style game. You, as a player, have to have the control of the direction you want the ball to bounce to, but it's just IMPOSSIBLE in this game.

This game has 75 levels and 15 bonus ones. I only needed to replay 2 levels (out of 90) more than once to get the 3 stars. All the other levels were done on the first try. It's just super easy. Level design has no diversity. Later levels just gets bigger in height and that's all.

The end of each level is just a big time waster. You literally can't hit the remaining things on the screen, because the ball can't bounce in that exact direction no matter how you try. At least they put in the timer, so that after some time of mindless bouncing around the level ends automatically.

Achievements. They are broken. I've completed the game and collected all 3 stars in each level. But I still didn't even receive the "get your first 3 stars" one. I didn't receive 2 other achievements also. All the remaining achievements wants you to grind the content double the amount of time you took to complete the game. This game has no replay value, no other modes than the main "story" one. So there is no incentive to actually try and grind.

The level editor is a nice touch, but this game is so lacking in features and variety, and polish - it just doesn't bring anything new.. It is a joyful game. It is very entertaining and has great visuals. I like the bonus features which allow to upgrade the characters. I enjoyed playing this game and would highly recommend it!. I had began to play "arkanoid games" with Arkanoid in good old C64 and I met TRAZ later and imo it was the best arkanoid game ever made. I actually haven't been impressed any kind of games during the last three decades until I play Doughlings.

Doughlings has been one of the nicest surprises of the year for me. It is highly polished game on every aspect and really fun to play. It has so many cool ideas. Bringing super heroes with different skills to a puzzle game works MARVELlous (:P) Also it merges both arkanoid and puzzle bobble style games succesfully, i really don't think there is any other alternative outthere...

Visuals feels like really polished Amiga games(Pinball Fantasies, Speedball 2 etc.) Graphics are so neat and stylish. Little doughlings looks really cute and fun to hit:)

And the last but not least, everthing runs smoothly, I didn't see any bug or glitch or anything ruins the playability.. great old school brick breaker game, fun and addective. It is a nice game. Controller works fine.. It's a great, oldschool game.

If you like old school arcade games you may love this game. With different characters and abilities it is definitely a fun game to play. My favorite features in this game are "level editor" (so you always have new levels to play) and "the end is nigh" (so you don't have to struggle to hit that last head up top).
