Vestel hitachi tv firmware for android version 12: android version 12 2021 year..Q: Laravel: output array with some html content I need to output an array of objects with some additional html code in it. I tried to do this by using response->withHTML, like in the docs, but unfortunately I got an error with the original content of the array. return response()->json(['1' => \$obj1, '2' => \$obj2]); Is there any way to output an array with some additional html code? A: This is explained in the docs : If you want to render the array and pass a value to withHTML, you may try the withHTML method as follows: In your case : return response()->json(['1' => \$obj1, '2' => \$obj2], ['1' => \$html_array['1'], '2' => \$html_array['2']]); Q: How to avoid async for loop hanging the UI thread? This is a follow up question to: I am afraid of Async Void question (Don't keep UI Thread on fire)? Below is my simplified code for selecting a song with a click of a button: private void btn1_Click(object sender, RoutedEventArgs e) { // Try to find a song from the list of music in the library. SongLyrics song = SongLyrics.Select(songLibrary, "Please" + name1.Text); switch (song.Data) { case SongLyrics.Play:

Dec 1, 2017 Hey Alastair, I have an experience similar to you as well. I recently got a Mynet TV-20 (32MB) with VESTEL- firmware. So to solve the random restarts I decided to download the latest firmware from VESTEL (VESTEL-35.02.20.14.0). I May 6, 2019 Everything worked fine for a very long time and then one day it started to reboot/lose data/sometimes it would spontaneously restart. I tested all the cables and confirmed that everything is fine. Nov 10, 2018 Hi, i have a Vestel Tecnologia TV 39MX64MB13 with Android 2.3.6 and firmware version 05.11.07.71.21.
